

STEP Conference for Teachers

Sea Change

Expanding the Role of Curiosity in Teaching & Learning

Teachers today must be able to encourage wonder and instill confidence so students have the tools for finding the answers to important questions. Students today must be curious, creative and self-directed capable of conceiving and implementing novel ideas. All presentations and activities associated with this program will center on how to develop these types of teachers and students.

Tuesday, October 4, 2016

3:30 p.m. to 6:45 p.m.
